PUBLICATION OF THE PATENT OFFICE

## **INTRODUCTION**

In view of the recent amendment made in the Patents Act, 1970 by the Patents (Amendment) Act, 2005 effective from 01<sup>st</sup> January 2005, the Official Journal of The Patent Office is required to be published under the Statute. This Journal is being published on weekly basis on every Friday covering the various proceedings on Patents as required according to the provision of Section 145 of the Patents Act 1970. All the enquiries on this Official Journal and other information as required by the public should be addressed to the Controller General of Patents, Designs & Trade Marks. Suggestions and comments are requested from all quarters so that the content can be enriched.

(57) Abstract :

A runtime prediction system (100) for an electronic device is disclosed. The system (100) may comprise a sensor unit (102) configured to collect real-time operating parameters, including battery voltage, battery current, workload, and network signal strength. Further, the system (100) may comprise a processing unit (104) operatively coupled to the sensor unit (102) and configured to determine instantaneous power consumption, estimate a usable battery capacity by applying a degradation factor, and predict remaining battery runtime based on current operating conditions. Further, the system (100) evaluates an energy requirement associated with execution of a task and compares the estimated remaining battery runtime with the evaluated energy requirement to determine task feasibility. Based on the comparison, the system (100) generates a prediction indicating whether the task can be completed and provides a corresponding notification to a user to adjust task execution.
